## *Emma Josephine Bradley Bovard Award*

GIZELLA S. LAKSANA

*B.S., Biomedical Engineering*  
*USC School of Engineering*

Gizella Laksana has maintained a perfect 4.0 grade point average in the baccalaureate/M.D. program while earning a bachelor of science degree in biomedical engineering with a minor in Spanish. She has been named a USC Renaissance Scholar for her study in disparate disciplines.

Gizella has complemented her scholarly achievements by conducting undergraduate research in neuroscience. Outside the classroom she has served as a mentor for the Asian Pacific American Student Services Center mentoring program, and has held leadership roles in the university's residential student community and the USC chapter of the Golden Key International Honour Society. She has also dedicated many hours to the local community as a volunteer for Spirits in Action, Alternative Spring Break, and as a participant in the USC Joint Educational Project.

Gizella's academic contributions, campus leadership, and commitment to community service exemplify USC's highest values. Her remarkable accomplishments have earned her the Emma Josephine Bradley Bovard Award.

SUSAN MACKIE

*B.S., Biochemistry*  
*USC College of Letters, Arts and Sciences*

Susan Mackie has maintained a perfect 4.0 grade point average while earning a bachelor of arts degree in biochemistry with a minor in Russian language. Her passion for academics is further exemplified by her undergraduate research in how Russian children acquire language. She has been named a USC Renaissance Scholar for her study in disparate disciplines.

Utilizing her academic talents outside the classroom, she has served as a tutor and group facilitator for the university's Supplemental Instruction Program. Susan has been a program chair for Trojans for Integrity, and served as a student appointee for the Peer Review Advisory Panel. Her commitment to community service is demonstrated by her service as a volunteer at the California Science Center and for USC's Alternative Spring Break.

Susan's scholarly achievements and notable contributions to the university and the community are in the highest traditions of USC. She is a worthy recipient of the Emma Josephine Bradley Bovard Award.

---

## *University Trustees Award*

SAMEER T. AMIN

*B.S., Biology*

*USC College of Letters, Arts and Sciences*

Sameer Amin has maintained a perfect grade point average of 4.0 while earning a bachelor of science degree in biology with a minor in business. A participant in the baccalaureate/M.D. program, Sameer has been designated a USC Renaissance Scholar for his study in disparate disciplines. He has participated in research projects sponsored by the Keck School of Medicine of the University of Southern California, and the Harbor-UCLA Research Education Institute, and is a contributor to articles published in the American Journal of Surgery and the Journal of Investigative Surgery. Sameer is a recipient of the USC Phi Beta Kappa Undergraduate Award.

Sameer has served as one of the directors of the Francisco Bravo High School SAT/college prep program. He was one of the founders of Collegiate Med Volunteers, an organization that has become the primary college volunteer program at Los Angeles County+USC Hospital. A volunteer with such community service organizations as Spirits in Action, Care Extenders, AIDS Project, and the Development in Literacy Program, Sameer has balanced his outstanding academic career with a stellar record of achievement and leadership outside the classroom. The University of Southern California is proud to recognize Sameer Amin as a University Trustees Award winner.

STANLEY CHOU

*B.A., Psychology, and B.S., Biomedical Engineering*

*USC College of Letters, Arts and Sciences/USC School of Engineering*

Stanley Chou has maintained a perfect grade point average of 4.0 while earning dual degrees in psychology and biomedical engineering. He has been designated a USC Renaissance Scholar for his study in disparate disciplines. His scholarly commitment is further demonstrated by his undergraduate research in neophobia, the fear of new stimuli related to nonassociative learning and emotional reactivity. He has served as a supplemental instruction leader in organic chemistry and physics, and has held numerous leadership roles on campus, including president of the USC chapter of the Golden Key International Honour Society, director of community affairs in USC Student Senate, and chair of USC's Philanthropy Fund Board.

Stanley has served as a mentor in the Francisco Bravo High School SAT/college prep program, and is a pianist with the Young Musicians Guild, a group of musicians committed to promoting an appreciation for classical music throughout the community and to performing for senior citizens. The University of Southern California is proud to recognize Stanley Chou as a University Trustees Award winner.

---

## *University Trustees Award*

ALI FAKHARI

*B.S., Chemical Engineering*  
*USC School of Engineering*

Ali Fakhari has maintained a perfect grade point average of 4.0 while earning a bachelor of science degree in chemical engineering. His academic merits are further exemplified by his membership in Phi Kappa Phi, the Golden Key International Honour Society, and the National Society of Collegiate Scholars.

The extent of Ali's impact on the university community rivals his contributions as a scholar. His leadership roles on campus include serving as vice president of the Engineering Student Council, and USC chapter president of the American Institute of Chemical Engineers. He has served the campus as a mentor for the USC School of Engineering, and the community as a volunteer for the USC Joint Educational Project. In recognition of his many contributions to the USC community, both inside and outside of the classroom, the University of Southern California is proud to recognize Ali Fakhari as a University Trustees Award winner.

SCOTT TAKANO

*B.S., Biomedical Engineering*  
*USC School of Engineering*

Scott Takano has earned a perfect 4.0 grade point average while pursuing a bachelor of science degree in biomedical engineering with a minor in health policy and management. His academic honors include designation as a USC Renaissance Scholar for his study in disparate disciplines, and membership in the Golden Key International Honour Society, Phi Kappa Phi, Tau Beta Pi, and Mortar Board. Scott has conducted undergraduate research in orthopedics and coronary disease, and participated in the University of Cambridge International Summer School Programme.

Scott has displayed leadership through his service in key positions in Alpha Epsilon Delta and Alpha Phi Omega. He has demonstrated a strong commitment to community service, having volunteered with Troy Camp, Spirits in Action, and the California Science Center. As co-founder of the Homeless Outreach Mentoring and Education Project, a USC student organization, Scott has worked with community groups to establish a free clinic slated to open early this year. In recognition of his many honors and accomplishments as a Trojan, the University of Southern California is proud to recognize Scott Takano as a University Trustees Award recipient.

## *Phi Kappa Phi Student Recognition Awards*

KAREN CARISSIMO

*Master of Professional Writing  
USC College of Letters, Arts and Sciences*

SHORT STORY: "Two Island Sisters"

Karen Carissimo skillfully filters this poignant story of loss and remembrance through the mind of Flora Tavares, one of two elderly Portuguese sisters whose decisions as young women have shaped their lives together as "widows of circumstance." Terminally ill and under the chiding care of her sister Vivian, Flora relives their fateful adolescence on the island of Maui during the final months of World War II—Vivian's failed courtship and Flora's own forbidden interracial romance with a Chinese boy—as she contemplates the betrayals that marred their once-loving sisterhood. Facing death and aware that she has only her memories, Flora desires not only to understand the past but ultimately to return to it.

For this beautifully structured and moving piece, Phi Kappa Phi is proud to present a Student Recognition Award to Karen Carissimo.

MARIA DELUCA

*B.A., English (Creative Writing)  
USC College of Letters, Arts and Sciences*

TWO MUSICALS: *Harry Heart and the Greatest Jug Band...Ever  
WAR!*

Recently performed at the USC student-run Brand New Theater, Maria DeLuca's two one-act musicals, complete with a dozen original songs, are a sparkling mix of creativity and convention. *Harry Heart* presents a bright and bouncy episode in the life of a performer who wants only two things in life: to be a famous jug band singer and to marry his one true love. In contrast, *WAR!* is a sharp satire alternating between three men in a bunker and three women in an army canteen, a set of delusional characters singing and dancing to the glories and illusions of war. With its clever wordplay and bizarre plot twists, the musical is truly innovative.

For these two delightful and creative pieces, Phi Kappa Phi is proud to present a Student Recognition Award to Maria DeLuca.

## *Phi Kappa Phi Student Recognition Awards*

KATHERINE GOODMAN

*Master of Professional Writing  
USC College of Letters, Arts and Sciences*

POETRY: "Selected Poems"

Seeking to express the ineffable, Katherine Goodman's poems give evidence of her range in substance, tone, and style. From haunting meditations on the remains of concentration camps to the lonely refrain of a writer of technical manuals—even when contemplating "A Warning in Peanut Butter"—her poems are striking and memorable. Her economical use of familiar language moves the reader from the commonplace to considerations of the profound. Rigorous and precise, with an especially strong evocation of nature in both a material and mental sense, Goodman uses poetry as a mode of revelation.

For these splendidly lyrical efforts to capture something beyond words, Phi Kappa Phi is proud to present a Student Recognition Award to Katherine Goodman.

GERALD GRELLET-TINNER

*Ph.D., Earth Sciences  
USC College of Letters, Arts and Sciences*

SCIENTIFIC RESEARCH PAPER:

"Dinosaur Eggs and Nesting: Implications for Understanding the Origin of Birds"

In this intriguing analysis, Gerald Grellet-Tinner offers further support for the various hypotheses that birds are descendants of dinosaurs rather than having evolved from the crocodylian line. Following the established precept in comparative zoology that specific genetic information is transcribed in the skeletal morphology of vertebrates, he hypothesizes that reptilian eggs, eggshell structures, nests, and nesting behaviors are equally influenced by their genetic makeup. Using scanning electron microscopy imaging, he compares the egg morphology and nesting behaviors of hard-shelled turtles, crocodylians, and a variety of dinosaurs to those found in extant ground-nesting birds. His careful documentation of the similarities between the eggs and nest attendance of non-avian theropod dinosaurs (i.e., troodontids and oviraptorids) and those of birds supports a compelling argument that birds are evolutionarily nested within Theropoda rather than Crocodylia.

For his innovative work in confirming with a new data set the dinosaur-bird relationship, Phi Kappa Phi is proud to present a Student Recognition Award to Gerald Grellet-Tinner.

## *Phi Beta Kappa Undergraduate Awards*

SAMEER T. AMIN

*B.S., Biology*

*USC College of Letters, Arts and Sciences*

Sameer Amin, a participant in the baccalaureate/M.D. program, has maintained a perfect grade point average of 4.0 while earning a bachelor of science degree in biology with a minor in business. He is a recipient of the University Trustees Award, and has been named a Dean Joan Schaefer Scholar. Sameer has participated in an extraordinary range of community service with such organizations as Spirits in Action and the Francisco Bravo High School SAT/college prep tutoring program. He was one of the founders of Collegiate Med Volunteers, an organization that has become the primary college volunteer program at Los Angeles County+USC Hospital, and has served in the Emerging Leaders Program in Alpha Lambda Delta.

Sameer has participated in research at the USC Keck School of Medicine and the Harbor-UCLA Medical Center, and is a contributor to two scientific articles. Awarded a Provost's Undergraduate Research Grant last spring, he has been recognized for his academic distinction by the Department of Biology with the prestigious Okin Scholar Award in 2001. Sameer has also been a participant in the University of Cambridge International Summer School Programme. He is planning to attend medical school in the fall. For his outstanding scholarship and many contributions to the university and community, the Epsilon Chapter of Phi Beta Kappa at the University of Southern California is proud to salute Sameer Amin.

LILIANA LOOFBOUROW

*B.S., Psychobiology, B.A., Creative Writing, B.A., Music*

*USC College of Letters, Arts and Sciences*

Liliana Loofbourow personifies depth with breadth, earning a bachelor of science degree in psychobiology, a bachelor of arts degree in creative writing, and a bachelor of arts degree in music (piano performance). She has been designated a USC Renaissance Scholar for her study in disparate disciplines, and is a Trustee Scholar and a Dean Joan Schaefer Scholar as well. Liliana was one of the founders and editors of the student literary magazine *Palaver*, and has served on the executive committee of the campus lecture series "What Matters to Me and Why." An accomplished poet, her texts have been set to music.

Liliana has volunteered in critical care at Santa Monica-UCLA Medical Center as well as at Children's Hospital in Santiago, Chile, one of her hometowns. At USC she has been a tutor in the Supplemental Instruction Program, and served with distinction as a research assistant in neuroscience with Dr. Albert Herrera. Her obvious capacity for leadership led to her acceptance in the course "The Art and Adventure of Leadership," taught by President Steven B. Sample and Professor Warren Bennis. For her scholarly achievements, her service to the community, and her leadership at the university, the Epsilon Chapter of Phi Beta Kappa at the University of Southern California is proud to salute Liliana Loofbourow.

---

## *Rockwell Dennis Hunt Award*

ARTHUR J. DHALLIN

*M.S., Industrial and Systems Engineering  
USC School of Engineering*

Arthur Dhallin is a doctoral candidate in the Department of Industrial and Systems Engineering in the USC School of Engineering. Arthur has earned the respect of the faculty members of the School of Engineering, who praise him for his intelligence, motivation, and enthusiasm, as well as his creativity and promise. A dedicated Trojan since his freshman year, Arthur received a bachelor of science degree cum laude in environmental engineering and a master of science degree in industrial and systems engineering.

His passion for his discipline has been recognized by many academic awards, including a USC Powell Scholarship, USC Trustee Scholarship, USC Merit Research Award, and the Robert C. Bryd Scholarship. Arthur is a member of the Phi Kappa Phi, Tau Beta Pi, Chi Epsilon, and Golden Key honor societies.

Arthur has sought opportunities to broaden his intellectual growth outside the classroom. Upon completion of his undergraduate degree, he worked as an information technology consultant for Digiterra, and recently joined Encompass Knowledge Systems, a developer of software for corporate governance and knowledge management, where he is a project manager.

For his academic achievement, embodiment of the university's traditions and objectives, and potential to represent the university with honor as an alumnus, the University of Southern California is pleased to present Arthur Dhallin with the Rockwell Dennis Hunt Award.

---

## *Outstanding Teaching Assistant Award*

PETER D. COUNTWAY

*Graduate Teaching Assistant*

*Biological Sciences*

*USC College of Letters, Arts and Sciences*

Peter Countway is one of those rare individuals endowed with a natural teaching ability. Bright, articulate, and caring, Peter has the rare ability to assess a student's comprehension of a subject and adjust his presentation of the material accordingly.

Tireless in his efforts to "reach" students, he cares immensely about the quality of undergraduate instruction at USC and strives to make each class the most fruitful experience possible. Devoted to exploring every possible option in the classroom, Peter is selfless in providing students with creative mechanisms for mastering a topic. His innovations include late-night study sessions and the design and implementation of new laboratory modules for his classes. His level of initiative and dedication far exceed what is expected from a teaching assistant, making Peter a tremendous resource for his students, and a valuable asset to the faculty.

Having received a bachelor of arts degree in zoology from the University of New Hampshire, and a master of science degree in marine science from the College of William and Mary, Peter combines an outstanding academic background with passion and dedication in the classroom.

For his outstanding contributions to the Department of Biology and the quality of undergraduate instruction in the USC College of Letters, Arts and Sciences, the University of Southern California is proud to recognize Peter Countway with the Outstanding Teaching Assistant Award.

---

## *President's Award for Staff Achievement*

ANNE MARIE CAMPIAN

*Director, Student Services and Graduate Studies  
USC Annenberg School for Communication*

With more than 20 years of outstanding service to the USC Annenberg School for Communication, Anne Marie Campian is a legend at the school and beyond. A tireless problem solver for faculty, staff, and students, Ms. Campian is known for her dedication and commitment to student services. During the merger of the units that came to form the USC Annenberg School for Communication, Ms. Campian played a key administrative role. Possessed of boundless energy and tremendous enthusiasm, she is an inspirational administrator and leader.

Ms. Campian combines professionalism, management skill, and vast organizational knowledge with an unswerving focus on service to students. She is also the companion and caretaker of the amiable, unofficial mascot of the school—Mega, the world's friendliest chihuahua. Faculty, staff, and students at Annenberg praise her as indispensable and omniscient. She is a loyal Trojan.

For her dedicated service to the Annenberg School for Communication and the entire university community, the University of Southern California is pleased to recognize Anne Marie Campian with the 2002 President's Award for Staff Achievement.

---

## *Distinguished Emeriti Awards*

HERBERT E. ALEXANDER

*Professor Emeritus, Department of Political Science  
USC College of Letters, Arts and Sciences*

Herbert E. Alexander is a founder of the field of political finance. Both as a scholar and as head of the Citizens Research Foundation, he led others to examine political finance, and produced publications that gave weight and visibility to the field that he defined. It was his seminal research that enabled other scholars to “follow the money trail.” And it was his leadership of the Research Committee on Political Finance of the International Political Science Association that put the study of political finance on a global footing. Colleagues recently recognized his contributions to the field by publishing an international festschrift in his honor.

Since his retirement from USC in 1997, Professor Alexander has remained an active contributor to the university, to his profession, and to the community. He continues to engage in research, participate in conferences, and publish in journals. He has been called on to serve as a consultant to Congress, to testify in campaign finance litigation, and to share his expertise with local audiences. Herbert Alexander’s 20-year tenure at the university has brought distinction to USC. The university continues to benefit from both his scholarship and his service.

For his seminal scholarship, dedication to teaching, and leadership in the academic community, the University of Southern California is proud to honor Professor Emeritus Herbert E. Alexander with a Distinguished Emeritus Award.

ROBERT S. ELLWOOD

*Professor Emeritus, School of Religion  
USC College of Letters, Arts and Sciences*

Robert Ellwood joined the USC School of Religion faculty in 1967, immediately upon receiving his Ph.D. in the history of religions from the University of Chicago. At his retirement in 1997, his contributions to the field included some 25 books, countless articles, and a distinguished career in the classroom comprising over 120 courses. His *Many Peoples, Many Faiths*, first published in 1976 and now in its sixth edition, remains a classic account of the world’s major religious traditions. His studies of religion in the 1950’s and 1960’s, and his most recent book, *Politics of Myth*, an examination of the life and thought of Carl Jung, Joseph Campbell, and Mircea Eliade, have been particularly influential. In 1998 Professor Ellwood received the distinction of being named general editor of *The Encyclopedia of World Religions*, a comprehensive, one-volume reference work designed to be the standard in the field.

A skilled, generous, and beloved teacher, Robert Ellwood has had an enormous and lasting impact on several generations of students. His willingness to devote time and attention to students while deeply involved in research and writing is a tribute both to his character and his extraordinary energy.

For his outstanding contributions as scholar, teacher, mentor, leader, and colleague, the University of Southern California is proud to honor Professor Emeritus Robert S. Ellwood with a Distinguished Emeritus Award.

---

## *Distinguished Emeriti Awards*

ALVIN S. RUDISILL

*University Chaplain Emeritus*  
*Professor Emeritus, School of Religion*  
*USC College of Letters, Arts and Sciences*

Alvin S. Rudisill received his Ph.D. in historical theology from Drew University in 1967 and came to USC in 1969 as university chaplain and associate professor of religion. He became university chaplain emeritus in 1995, and professor of religion emeritus following his retirement in 1997. A skilled and devoted teacher he has continued to teach in the School of Religion every semester since his retirement.

As director of the Office of Civic and Community Relations from 1984 to 1987, and then as associate vice president for civic and community relations until his retirement from the chaplaincy in 1995, Professor Rudisill played a seminal role in initiating and developing the relationship between USC and the community—a relationship that continues to flourish today. Through his commitment to community service, he played a major role in USC's recognition by *Time* magazine as College of the Year 2000.

In addition to his service in the chaplaincy, the classroom, and the community, Professor Rudisill has achieved distinction as a scholar of bioethics. He served as associate professor of biomedical ethics in the then USC School of Medicine from 1982 to 1995, teaching bioethics both to second-year students and medical school faculty. He was recently honored by the Keck School of Medicine of the University of Southern California with the title professor emeritus of medicine.

For his outstanding contributions to scholarship, to the university, and to the community, the University of Southern California is proud to honor University Chaplain Emeritus and Professor Emeritus Alvin S. Rudisill with a Distinguished Emeritus Award.

---

## *Distinguished Emeriti Awards*

ROGER SWEARINGEN

*Professor Emeritus, School of International Relations  
USC College of Letters, Arts and Sciences*

Rodger Swearingen, a distinguished scholar of Soviet foreign policy and world communism, has devoted his entire professional life to USC. A quintessential Trojan, he attended USC on a four-year scholarship, playing lead trombone in the Trojan marching band. After receiving a B.A. in Asiatic studies, he spent four years in military intelligence during World War II, then returned to USC for an M.A. in international relations. After receiving a doctorate from Harvard, Professor Swearingen joined the faculty of the USC School of International Relations, where he conducted seminal research in Soviet foreign policy and world communism. The conferences that he organized gave the school international visibility, and he played a key role in the formation of an institute on communist affairs. One of its publications, the quarterly *Studies in Comparative Communism*, has been published since 1969.

His teaching has reflected his intense interest in the theory and practice of policy-making and diplomacy. His scholarship was enriched by research trips to the Pacific Command, the Soviet Union, Europe, and Asia, often at the invitation of foreign governments. He is the author of 10 books, one of which, *The Soviet Union and Postwar Japan*, was characterized by a former U.S. president as “not only a distinguished historical work but an indispensable analysis for policymakers.”

For his outstanding contributions to the university and to the advancement of scholarship in Soviet foreign policy and world communism, the University of Southern California is proud to honor Professor Emeritus Rodger Swearingen with a Distinguished Emeritus Award.

---

## *Phi Kappa Phi Faculty Recognition Awards*

MARY L. DUDZIAK

*Judge Edward J. and Ruey L. Guirado Professor of Law and History  
USC School of Law*

BOOK:

“Cold War Civil Rights: Race and Image of American Democracy”

*Cold War Civil Rights* is a brilliant and groundbreaking examination of the ways in which the civil rights movement became, in the eyes of Cold War policymakers, a thorny foreign policy issue. Mary Dudziak argues that international influence helped facilitate major social reform, including desegregation. Her book has been hailed as a major contribution to our understanding of both the civil rights movement and the Cold War itself. She employs lucid and powerful prose to develop a sophisticated and wide-ranging argument. The book is a model of serious but accessible scholarship. It is with pride that Phi Kappa Phi honors Professor Mary Dudziak with a Faculty Recognition Award.

PERCIVAL EVERETT

*Professor of English  
College of Letters, Arts and Sciences*

BOOK:

“Erasure: A Novel”

(University Press of New England, 2001)

Percival Everett has established himself as one of the most profoundly daring and original novelists in America. With apparently limitless wit and learning, he creates linguistic puzzles that become fully realized worlds. Despite his irony and elusive tricks, his fictional worlds offer moving images of personal possibility. His latest novel, *Erasure*, offers a biting and hilarious fable of race, fictionalizing, and the uneasy triumph of good sense. The novel combines the story of a man coming to terms with his family heritage with a satiric indictment of race and publishing in America. For this major artistic accomplishment, Phi Kappa Phi is proud to honor Professor Percival Everett with a Faculty Recognition Award.

ARIELA J. GROSS

*Professor of Law and History  
USC School of Law*

BOOK:

“Double Character: Slavery and Mastery in the Antebellum Southern Courtroom”  
(Princeton University Press, 2000)

In *Double Character* Ariela Gross takes us inside the courtrooms, large and small, of the antebellum South, showing through an analysis of hundreds of cases how buyers and sellers settled their disputes over slaves. Her powerful study of the law and culture of slavery reveals the way all parties reached for narratives prevalent at the time in order to explain and justify their actions. By doing so, they helped shape and sustain various expressions of racial ideology. Her scholarship shows us how the power of law came to sanction a group of assumptions about race that we still battle today. It is with great pride that Phi Kappa Phi honors Professor Ariela Gross with a Faculty Recognition Award.

*USC Associates Award  
for Excellence in Teaching*

JEAN MORRISON

*Associate Professor of Earth Sciences  
USC College of Letters, Arts and Sciences*

Jean Morrison has made an enduring contribution to the quality of undergraduate education at USC. An accomplished teacher and respected researcher, she possesses an extraordinary ability to share her excitement about scientific discoveries. She cares deeply about teaching, and effectively demystifies science in order to convey the power and mystery of nature. Known for her compelling lectures, she brings passion to discussions of how light travels through minerals and the origin of gold.

She is equally at home in the classroom, in the laboratory, and in the field. Expeditions are an integral aspect of her courses. In the field, her students gain an understanding of the earth in a setting that strips away conventional barriers between student and professor. She is a mentor and role model to students. Not only her teaching but also the quality of her research has inspired deep respect among her colleagues.

Professor Morrison received her Ph.D. in 1988 from the University of Wisconsin and joined the USC faculty in that same year. She is currently conducting research funded by the National Research Foundation and is responsible for maintaining a large multi-element stable isotope laboratory in the Department of Earth Sciences. An editor for two leading journals in her field, she also serves on review panels for the National Science Foundation.

For her inspired teaching and enduring contribution to undergraduate education, the University of Southern California is pleased to honor Professor Jean Morrison with a USC Associates Award for Excellence in Teaching.

*USC Associates Award  
for Creativity in Research and Scholarship*

BARRY GLASSNER

*Professor of Sociology*

*USC College of Letters, Arts and Sciences*

*Director, Casden Institute for the Study of the Jewish Role in American Life*

From his early research on drinking patterns among American ethnic and religious groups to his recent and widely acclaimed book, *The Culture of Fear*, Professor Barry Glassner has distinguished himself as a leading scholar in the study of contemporary American culture and as a major public intellectual. The author of four books, coauthor or editor of eight others, and author or coauthor of nearly 100 articles, reports, and commentaries, Glassner's research has been influential in several fields within the social sciences and media studies. His honors include the designation of his recent work as one of the best books of the year by the *Los Angeles Times* and other newspapers.

Professor Glassner received a Ph.D. from Washington University, and subsequently served as a research associate with the Maxwell Policy Center on Aging. He taught at Syracuse University between 1977 and 1987, becoming chair of its Department of Sociology in 1984. Following three years as department chair at the University of Connecticut, he came to USC in 1991. As professor and chair in the Department of Sociology, director of USC's Casden Institute for the Study of the Jewish Role in American Life, and advisor to his students, Professor Glassner embodies the highest values of academe.

For his important contributions to the disciplines of the social sciences and the intellectual life of the nation, and his leadership and service to the campus and community, the University of Southern California is proud to present Professor Barry Glassner with the USC Associates Award for Creativity in Research and Scholarship.

---

*USC Associates Award  
for Creativity in Research and Scholarship*

CHARLES G. SAMMIS  
*Professor of Geophysics and Materials Science  
USC College of Letters, Arts and Sciences*

Charles Sammis, professor of geophysics and materials science, is being recognized today for his creative use of techniques borrowed from physics, chemistry, and engineering to better understand earthquakes. His contributions include the use of fractal geometry to describe the structure and mechanics of faults, and mathematical techniques from statistical physics to describe the spatial, temporal, and magnitude distribution of earthquakes.

Although earth science is inherently interdisciplinary, Professor Sammis has exhibited extraordinary breadth, publishing papers with USC faculty in physics, chemical engineering, and materials science. He has held honorary positions in the School of Theoretical Chemistry at the University of Bristol, the School of Engineering at Cambridge University, and the Institute of Theoretical Physics at the University of Mexico.

Professor Sammis received his Ph.D. from the California Institute of Technology in 1971 and spent the following year on a NATO Postdoctoral Fellowship. He was a member of the faculty at Pennsylvania State University before coming to USC in 1977. A past chair of the Department of Earth Sciences, he is the author of 27 papers and two books. Professor Sammis is considered a pioneer in applying the theory of material properties to problems in fault zone mechanics.

For his excellence in research and his capacity to bridge multiple disciplines, the University of Southern California is pleased to honor Professor Charles Sammis with a USC Associates Award for Creativity in Research and Scholarship.

---

## *Presidential Medallion*

SIMON RAMO

*Co-Founder and Director Emeritus, TRW, Inc.*

*Community Leader, Philanthropist*

Simon Ramo, recipient of the Presidential Medal of Freedom, the nation's highest civilian award, is a co-founder and director emeritus of the aerospace corporation TRW, Inc., a Fortune 500 company and one of the world's largest technological corporations. A distinguished figure in American science and technology, Dr. Ramo was the chief scientist in the development of the U.S. intercontinental ballistic missile. His accomplishments in science and technology are matched only by his service to his country: his is a leading voice in national science and technology policy.

After graduating from the University of Utah, Dr. Ramo attended the California Institute of Technology, where he received a Ph.D. in electrical engineering and physics at the age of 23. He joined General Electric, where he contributed to the development of the electron microscope and attained international recognition as a pioneer in microwave technology. Before the age of 30, Dr. Ramo held 25 patents in electronics. In 1946 he established Hughes Electronics and turned his focus on advanced military electronics for guided missiles.

Along with his colleague Dean E. Wooldridge, Dr. Ramo established Ramo-Wooldridge Corporation in 1953. Five years later their corporation merged with Thompson Products to form TRW, Inc. The outcome of their collaboration was the U.S. Air Force project to develop the intercontinental ballistic missile. As the chief scientist and technologist of the project, Dr. Ramo forged the cooperation between the Air Force and industry essential to the development of the national military space program.

During the Ford administration Dr. Ramo served as chairman of the President's Committee on Science and Technology. He has served as a member of the White House Council on Energy Research and Development and the National Science Board. He is a recipient of the National Medal of Science, the nation's highest recognition for scientific achievement. The National Academy of Engineering honored Dr. Ramo as the first recipient of its award for statesmanship in national science and technology policy.

Dr. Ramo has played a significant role in higher education for decades. While still with Hughes Electronics in the 1940s, he served as an adviser to the USC School of Engineering. With his guidance, graduate programs in engineering were created that represent a model of collaboration between industry and the university. The recipient of honorary doctorate degrees from numerous prestigious universities, he has contributed his expertise to the boards of various academic institutions and has also been a director or trustee of many philanthropic and professional organizations.

When his wife Virginia was elected to the USC Board of Trustees in 1971, Dr. Ramo became an advisor on a wide range of issues to the senior administration of the university, and most especially to Presidents Hubbard, Zumberge, and Sample. His many contributions in this regard were recognized in 1972 when USC awarded him an honorary doctor of laws degree.

In 1999 the W. M. Keck Foundation awarded USC a \$110 million naming gift. In his capacity as a director of the foundation, Dr. Ramo played an important role in paving the way for this gift. He and his wife Virginia then served as founding co-chairmen of the Board of Overseers of the Keck School of Medicine of the University of Southern California. Much of the credit for recruiting this extraordinarily strong board belongs to Dr. Ramo.

For his contributions to science and technology, for his service to the nation and higher education, and most especially for his service to USC, the University of Southern California is proud to present Simon Ramo with the Presidential Medallion.

---

## *Presidential Medallion*

VIRGINIA RAMO

*USC Trustee, Community Leader, Philanthropist*

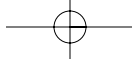

Virginia Ramo, one of Southern California's foremost community leaders and philanthropists, is a graduate of the University of Southern California, which has also granted her the degree of doctor of humane letters. A distinguished philanthropist, Mrs. Ramo was a co-founder of the Simon and Virginia Ramo Foundation which has made possible the Virginia Ramo Hall of Music at USC, the Ramo Auditorium at the California Institute of Technology, and numerous endowed chairs, awards, and scholarships at several universities.

Mrs. Ramo has served USC with enthusiasm, vision, and dedication in various capacities. She is a Life Trustee, having been a member of the USC Board of Trustees since April 1971. Through her service as vice chairman of the board and vice chairman of its student affairs committee, Mrs. Ramo has contributed significantly to USC's ascent to the top tier of major research universities. She has also served as co-chairman of the Friends of the USC Library. Along with her husband Simon, Mrs. Ramo has served as an advisor to Presidents Hubbard, Zumberge, and Sample, and as co-chairman of the Board of Overseers of the Keck School of Medicine of the University of Southern California.

Among her many community, cultural, and educational activities, Mrs. Ramo has been a director and vice president of KCET Community Television, and has served on the boards of the Los Angeles County Museum of Science and Industry; the Los Angeles County Heart Association; the Founders and the Blue Ribbon 400 of the Music Center of Los Angeles County; the ARCS Foundation, a national volunteer women's organization that provides scholarships in the natural sciences, medicine, and engineering; the Los Angeles Opera Association; the United Way of Los Angeles; the Doheny Eye Institute; Les Dames; and the Women's Guild of the Cedars of Lebanon Hospital.

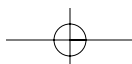

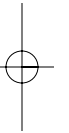

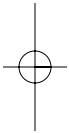

Mrs. Ramo has been the recipient of the Distinguished Achievement Award of the American Heart Association, and the Asa V. Call Achievement Award, USC's highest honor given to distinguished alumni. The Asa V. Call Award recognizes alumni who have demonstrated exceptional commitment to the university and community by giving generously of their time, energy, and leadership. It also celebrates those who, by excelling in their chosen field, have brought outstanding recognition to themselves and USC through their individual accomplishments.

For her outstanding contributions to higher education and the cultural life of Southern California, her leadership in community service, and her faithful and invaluable service to her alma mater, the University of Southern California expresses its enduring appreciation and respect by presenting Virginia Ramo with the Presidential Medallion.

\* HARRISON M. KURTZ

*1925-2001*

The University of Southern California would like to remember distinguished Professor Emeritus Harrison M. Kurtz, member of the Academic Honors Convocation Committee, who served the University of Southern California for 50 years. Founder and director of SCynergy, the Biological Sciences Alumni Support Group, former president of the Retired Faculty Association, and Permanent Master of the honorary society Skull and Dagger, Harry was twice awarded the USC Associates Award for Excellence in Teaching. He was deeply loved by all who knew him.
