

Contents

1	ODE	3
1.1	The first order system	4
1.2	Initial value problem	4
1.3	Integral form	4
1.4	Gronwall inequality	4
1.5	First order equation with a parameter	4
1.6	Contraction mapping principle	4
1.7	Continuation of solutions	4
1.8	Continuation of linear equations	4
1.9	Autonomous versus non-autonomous	4
1.10	Linearization about a stationary point	4
1.11	Jordan decomposition	4
1.12	Cayley-Hamilton theorem	4
1.13	Real Jordan decomposition	4
1.14	Stable equilibrium points	5
1.15	Asymptotically stable equilibrium points	5
1.16	Stable Manifold Theorem	5
1.17	Center Manifolds	5
1.18	Lyapunov-Perron Formula	5
1.19	Abel-Liouville's Theorem	5
1.20	Perron's Reduction Theorem	5
1.21	Logarithm of a matrix	5
1.22	Floquet's Theorem	5
2	Flows	7
2.1	Continuous and Discrete Flow. Definition	7
2.2	Orbits. Positive and Negative orbits	7
2.3	Omega-limit sets	7
2.4	Invariant Sets	7
2.5	Positively compact orbits	7
2.6	Poincare-Bendixson Theorem	7
2.6.1	Limit Cycles	7

2.6.2	Poincare Map	7
2.7	Bendixson Theorem	7
3	Bifurcations	9
3.1	Examples	9
3.1.1	Non-Bifurcation	9
3.1.2	Fold Bifurcation	9
3.1.3	Discontinuous or Hysteresis-like Bifurcation	9
3.1.4	Pitchfork Bifurcation. Subcritical and Supercritical cases	9
3.1.5	Fold or Cusp Bifurcation	9
3.2	Equilibria with quadratic degeneracy	9
3.3	Bifurcations in \mathbb{R}^2	9
3.4	Hopf Bifurcation	9
3.5	Bifurcation in Discrete Case-Maps	9
3.5.1	Examples	9
3.5.2	Neimark-Sacker Bifurcation	9
4	Skew Product Dynamical Systems	11
4.1	Examples	11
4.2	Retarded Functional D.E.	11
4.3	Autonomous Retarded Functional D.E.	11
4.4	Shift Flow	11
4.5	Linear Skew product flow	11
